

Session 38

General Seismology. Earthquake observation and new challenges

Conveners:

Constantin Ionescu¹, Maria-Jose Jimenez², Stefano Parolai³, Sebastiano D'Amico⁴

¹ *National Institute for Earth Physics, Romania*

² *Agencia Estatal Consejo Superior de Investigaciones Científicas, MNCN, CSIC, Spain*

³ *National Institute of Oceanography and Applied Geophysics, Italy*

⁴ *University of Malta, Department of Geosciences, Malta*

The session is intended to cover any topic in seismology which may not be directly relevant to any of the other sessions. We welcome contributions dealing with seismicity and seismotectonics of regions in or outside the Euro-Mediterranean area, global and planetary seismology, novel ideas or improvements to conventional methodologies and data management, theoretical or applied aspects of seismology, relevant aspects and challenges raised by the recording and investigating of recent notable earthquakes.
